*Preferred or **Required for Biology degree at WCU.

There are many options within the AA College Transfer program. This sample is just one of many plans. Students should work closely with advisors to determine best plan to meet individual interests and goals. A student who stays on this plan should apply to WCU in fall of Year 2 and can graduate with AS in spring of Year 2.

Because this student has completed several credits in high school, it would be possible for the student to take MAT 152 as Statistics a recommended elective for the major at WCU. This and any other "extra" courses would not likely be covered by financial aid. Discuss your options with an advisor.
